Industrial premises

Warehouses

Cold stores

Freezer facilities

Food industry

Separation of work areas

For protection from dust, chips, liquids and noise

Openings with structures that rule out gates and doors as an option

Stables

Horse boxes

## PRESSIO.FIX STRIP CURTAIN

**Simple self-installation – low follow-up costs**

If the structure of an opening rules out gates and doors as an option, an individual solution is required. Our Pressio.fix strip curtain is a versatile choice – for anywhere from cold stores and warehouses to horse stables.

The Pressio.fix strip curtain has a simple click-in system that allows you to install it yourself. It also lets you fit and remove the individual PVC strips as required, at any time and without the use of tools.

A flexible, multi-section rail configuration, which can be extended and shortened as needed, allows you to adjust the width of the strip curtain. Special configurations are available on request.

The transparent PVC strips have rounded edges. This allows safe and easy access. The PVC strips are supplied in a range of widths and thicknesses (100 x 2 mm, 200 x 2 mm, 300 x 3 mm and 400 x 4 mm). We offer versions for normal temperatures, low temperatures

and freezer conditions, covering a range from as high as 50 °C to as low as -60 °C.

Pressio.fix also offers an outstanding price-performance ratio and good insulating properties. The individual strips are supplied in rolls, cut to the desired length, ready-perforated and with the required holes. Our strip curtains cut your long-term operating costs, while helping to reduce illness-related absences due to draughts and cold.

The individually configurable overlap of each replaceable strip allows you to adapt the strip curtain to a wide range of particular situations.

Just call to find out more about our high-quality products, customer advice and other services, or contact us by e-mail.

We will be pleased to provide further advice.

## INSTALLATION INSTRUCTIONS

1. Unpack your Pressio.fix

2. Mark and drill the fixing holes

3. Install the rail

4. Hang the strips in place

5. Fold the rail shut

## CUSTOMER BENEFITS

Simple installation, thanks to our click-in system

Variable overlap

Individual strips can be removed and replaced without the use of tools

Low follow-up costs

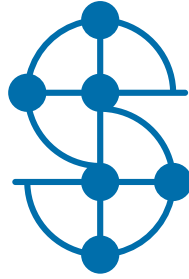

Easy to clean

Energy-efficient

Maintenance-free in the long term

Available in fixed or movable configuration

Made in Germany
